PROFILE SUMMARY

Experienced IT specialist and software developer. Skilled in modern android development, relational database management systems, and IT technical support. Eager to utilize my skills and learn the most recent technologies.

EDUCATION

Saudi Electronic University

1440 – 1445

Bachelor, Information Technology Cumulative GPA: 3.66/4.00

SKILLS

Android Developer

- 1 Year of experience in Android Development with the most recent technologies.
- Integrating external services (REST API), and third-party libraries efficiently.
- Build secure and high-performance Industry-level apps.
- Experience with Git and GitHub version control to track project changes.
- Integrate Firebase services to enhance apps functionality.

IT Specialist

- Installing operating systems and software programs on computers.
- Installing and deploying hardware equipment.
- Troubleshooting hardware, software, and network issues.
- Managing cloud hosting environments, including domain, SSL, and DNS configurations.

WORK EXPERIENCE

Huzmh Edu, Android Developer

Rajab 1446 – Present

The new maintainer of the Huzmh Android project, which aims to facilitate and help the teachers daily work. The project consists on two apps; <u>Teacher Package</u> and <u>Student Package</u> that is currently published to Google Play. Helped in fixing many errors and improving user experience, which led to higher customer satisfaction.

Freelance, Android Developer

Working on freelancing and hobby projects on my free time. I have published `Sunnah in Weaher` application on Google play; The first Islamic mobile application to track weather conditions and forecasts and remind you of the prophet Sunnah, peace be upon him.

Bayt Alebaa, IT Technical Support Internship

Rajab 1445 – Ramadan 1445

Two month internship for IT technical support. The internship focuses mostly on installing and debugging software and hardware issues.
